

NLP Pipeline for Unstructured Clinical Data – Manual

Ayoub Benchaita
abenchaita3@gatech.edu

To use the application go to <https://clinical-nlp-pipeline.ue.r.appspot.com> and either enter a clinical note in the text area and select "Predict" or enter a CSV file containing a series of clinical notes in quotes separated by commas via the "Upload and Convert" button. The clinical notes should be separated as follows: "clinical note #1", "clinical note #2"... After a delay the browser will either download the outputted diagnosis codes in a CSV or ask you if you want to download then download.
